

Deciphera Pharmaceuticals, Inc. to Present at Upcoming Investor Conferences

November 13, 2019

WALTHAM, Mass.--(BUSINESS WIRE)--Nov. 13, 2019-- Deciphera Pharmaceuticals, Inc. (NASDAQ:DCPH), a clinical-stage biopharmaceutical company focused on addressing key mechanisms of tumor drug resistance, today announced that members of the management team will present at the following investor conferences:

- Jefferies 2019 London Healthcare Conference on Wednesday, November 20 at 2:40 PM GMT in London
- Piper Jaffray 31st Annual Healthcare Conference on Thursday, December 5 at 9:30 AM ET in New York

A live webcast of both events will be available on the "Events and Presentations" page in the "Investors" section of the Company's website at <https://investors.deciphera.com/news-events/events-presentations>. A replay of the webcast will be archived on the Company's website for 90 days following the presentation.

About Deciphera Pharmaceuticals

Deciphera Pharmaceuticals is a clinical-stage biopharmaceutical company focused on improving the lives of cancer patients by addressing key mechanisms of drug resistance that limit the rate and/or durability of response to existing cancer therapies. Our small molecule drug candidates are directed against an important family of enzymes called kinases, known to be directly involved in the growth and spread of many cancers. We use our deep understanding of kinase biology together with a proprietary chemistry library to purposefully design compounds that maintain kinases in a "switched off" or inactivated conformation. These investigational therapies comprise tumor-targeted agents designed to address therapeutic resistance causing mutations and immuno-targeted agents designed to control the activation of immunokinases that suppress critical immune system regulators, and agents designed to inhibit reprogramming of cancer cell metabolism. We have used our platform to develop a diverse pipeline of tumor-targeted, immuno-targeted, and metabolism-targeted drug candidates designed to improve outcomes for patients with cancer by improving the quality, rate and/or durability of their responses to treatment
